

HUSSEIN BOUIK

Software Engineer | React, TypeScript, .NET & Microsoft Azure

Avenue Hay Al Hassani, Tangier, Morocco | +212 660288007 | housseinbouik5@gmail.com
linkedin.com/in/houssein-bouik | github.com/housseinbouik

PROFESSIONAL SUMMARY

Software Engineer experienced in developing enterprise, cloud-native, and high-performance web applications using React, TypeScript, .NET, and C#. Skilled in full-stack development, microservices, event-driven architecture, workflow automation, financial ERP systems, and advanced 3D product configurators. Experienced in collaborating with international and cross-functional teams to deliver scalable, secure, and maintainable software solutions.

TECHNICAL SKILLS

Programming Languages	C#, TypeScript, JavaScript, SQL, PHP
Frontend	React, Next.js, React Three Fiber, Three.js, Drei, Zustand, HTML, CSS, Tailwind CSS, Bootstrap
Backend	.NET, .NET Framework, Entity Framework, Node.js, Express.js, Laravel
Architecture	Microservices, CQRS, Sagas, Event-Driven Architecture, REST APIs, Role-Based Access Control
Cloud and DevOps	Microsoft Azure, Kubernetes, Azure B2C, Azure Service Bus, AWS, Docker, Git, GitHub
Databases	Cosmos DB, SQL Server, PostgreSQL, MySQL, MongoDB, Firebase
Tools and Platforms	Camunda BPM, LlamaIndex Cloud, Visual Studio, VS Code, Postman, Jira, Figma

PROFESSIONAL EXPERIENCE

Software Engineer

NTT DATA, Inc. | *March 2026 - Present*

- Develop and maintain the Unified Volunteers Platform for United Nations Volunteers, centralizing volunteer registration, candidate profiles, host-agency management, opportunity creation, assignments, and recruitment workflows.
- Build full-stack features across a React and TypeScript frontend and a .NET microservices backend, including role-based access, multilingual interfaces, document handling, search, notifications, and external-system integrations.

Key Achievement: Contributed to scalable and secure cloud-native workflows using Microsoft Azure, Kubernetes, Azure B2C, Azure Service Bus, Cosmos DB, SQL databases, Camunda BPM, CQRS, Sagas, and event-driven communication.

Frontend React Developer

Tecnibo | *Hybrid* | *August 2025 - March 2026*

- Developed advanced 3D configurator systems for Oaksome using React, TypeScript, React Three Fiber, Three.js, Drei, and Zustand.
- Engineered modular systems for doors, partitions, walls, zoning logic, dressings, linear division, dynamic element generation, spatial planning, and real-time product configuration.

Key Achievement: Improved configurator responsiveness, loading performance, rendering efficiency, and interaction fluidity through reusable components, code optimization, and scene-management strategies.

Full-Stack Engineer - Commercial and Financial Applications

WINS - WinBooks Maroc | *Tangier, Morocco* | *November 2024 - July 2025*

- Developed and optimized commercial, accounting, invoicing, and administrative modules for WinHub using .NET, C#, SQL Server, and Entity Framework.
- Implemented an AI-assisted bank-statement import system using LlamaIndex Cloud and developed a multi-invoicing module for generating, consolidating, and validating multiple invoices.

Key Achievement: Automated financial-data processing and improved order, delivery, invoicing, transaction-traceability, and data-synchronization workflows while supporting a modular and maintainable backend architecture.

EDUCATION

Certificate in Web and Mobile Development

Solicode Training Center, Tangier, Morocco | *2022 - 2024*

Focused on Full-Stack Development, Mobile Application Design, and Database Management.

Bachelor of Science in Mathematics and Computer Science

University of Abdelmalek Essaadi, Morocco | *2020 - 2023*

Specialized in Data Structures, Algorithms, Software Engineering, Mathematics, and System Architecture.
